

TEAM ADVENTURE SEEK

Team Adventure Seek is our version of the popular "geocaching," combining Global Positioning System (GPS) technology with hiking, skiing or snowshoeing all coordinated into a business account.

DETAILS

Teams of 2-5 are taught how to operate GPS units. Our mountain and urban courses contain several hidden camps, each assigned with a dollar value based on how difficult they are to find.

Teams choose their own adventure to achieve their financial goals, compete against other teams and negotiate competition vs. collaboration as we compare you to other corporations who have been through our courses.

LOCATIONS:

- Sundance Resort
- Snowbird
- Deer Valley Resort
- Utah Olympic Park
- Park City Mountain
- Let us build a course near you!

GROUP SIZE: 5-70

TEAM SIZE: 7-10

LENGTH: 2.5-3 HOURS

BENEFITS

Successful teams will plan, communicate, cooperate, develop leaders, and assess risks, transfer knowledge and solve problems throughout their adventure.

Successful companies will require their teams to work together.

All of our workshop adventures include a "decent" with guide and facilitators to explore opportunities and barriers, and review how teams/companies went about their adventure challenges.

At Park City Teamworks, we guide business teams on wilderness adventures to improve performance and encourage organizational change.

The outdoor adventures you experience will allow you to explore new boundaries and unleash your team's creativity. We are confident your growth solutions lie within your team and can be released when you experience any of our business adventures.
